

# Install Software

LastPass Enterprise provides various installation options and parameters including:

- Windows and Mac installers
- Automated silent installation
- MSI installation for Group Policy Object (GPO)
- [Windows Login Integration](#)
- Customize your install with additional command line arguments

## Installing LastPass

1. To install LastPass for your organization, go to the Install Software page in the Admin Dashboard. It can be found under Setting ([https://lastpass.com/enterprise\\_install.php](https://lastpass.com/enterprise_install.php)).
2. Verify the configurations you need for the installation:

Install Software	
Choose Your Install Configuration	
Select your platform.	Microsoft Windows (Vista or greater) ▼
Select your architecture.	64bit ▼
Do you require <a href="#">Windows Login Integration</a> ?	No ▼
Do you require filling of fields in <a href="#">Windows Applications</a> ?	No ▼
Do you require a Manual GUI Install or an Automated Silent Install?	Automated Silent Install: my users will have th ▼

3. Once the configuration has been identified, steps customized for your install will appear. For example, below are some of the steps for the configuration for a silent installation on Windows without Windows Login Integration:

# Install Software

Select your architecture.	64bit
Do you require <a href="#">Windows Login Integration</a> ?	No
Do you require filling of fields in <a href="#">Windows Applications</a> ?	Yes
Do you require a Manual GUI Install or an Automated Silent Install?	Automated Silent Install: my users will have th

## Windows Automated Silent Install

- Download the Windows LastPass Installer : [lastpass\\_x64full.8029616.exe](#)
- Run the following command from an **Administrative** command prompt.

```
lastpass_x64full.8029616.exe -si --userinstallie --userinstallff --userinstallchrome --installforallusers
```

- You can run the above command from a login batch file to automate installation.
- This option will work even if the Administrative user does not have an account on the computer where LastPass is being installed.
- The installation may take several minutes to complete. You can open Task Manager and search for the process to determine if the install completed.

## Open an Administrative Command Prompt
